

CONFIDENTIAL – FOR INTERNAL USE ONLY

## WSV6 Bulletin

### Objective:

On **Tuesday (7-26-2022)** E-Select will be updating its offering of the WSV6 family. The update will include the following changes.

Item(s) to be added:

- Water-Side Economizer to WSV6 size 048, 060, 072
- Geothermal insulation kits to WSV6 sizes 009-072
- Hot Gas Reheat to WSV6 sizes 009-072
- Energy Star notation to submittals
- Updated filter rack selections for WSV6 sizes 009-120

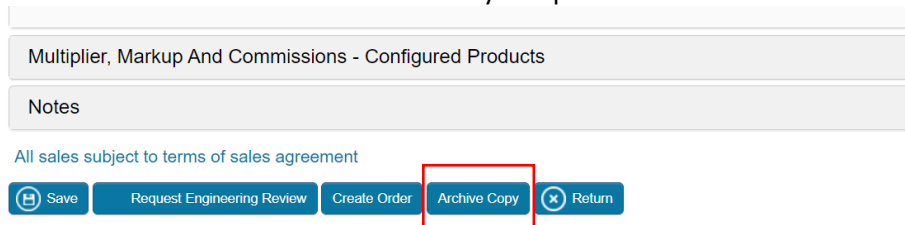

Item(s) to be removed:

- 1" Filter frame is being removed since all units will ship with a 2" / 1" convertible filter frame.

At that time some current pricing and features will be adjusted to accommodate this update.

### Next Steps:

If you have any active quotes with the WSV6 product on them, please save an archived version so any agreed pricing is not lost. To do so select the 'Archive' button at the bottom of your quote in E-Select.

Any units with a 1" frame selected will automatically select the next available size (2" Frame) at no additional cost. With the addition of these feature pricing has be updated slightly, base unit costs remain unchanged. These changes only effect configurations, updated Fan performance for units with Water-Side Economizer and Geothermal have **not** been added to E-Select. Those updates are to be determined.
